

How to descale the Keurig K Supreme coffee maker

Descal light is on. We need to clean things up

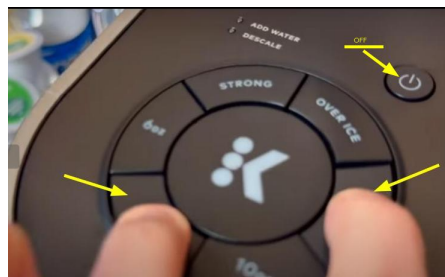

- Remove the cartridge receptacle for cleaning by pressing up from below.

- Remove the tank, clean it and empty it and replace it.
- While we are at it, clean the coffee stains off all the parts. The golden rule of tech maintenance is clean, clean, clean.

Descal as follows

- Turn off.
- Add 50/50 Vinegar/Water enough for 3 cups to the empty tank.
- with **power off** press both **8** and **12** buttons simultaneously for **3 seconds**.

- With cup to receive water in place, press K, empty the cup. Open and Close, Repeat twice more.
- Empty the tank, replace with clean water.
- Do 3 or more rinse cycles to clean out the vinegar solution.
- If light is still on, unplug and replug after 30 secs
- Done
