GPG Key How To

I ran across a good detailed piece of advice about how to manage your GPG keys in the context of possibly stolen or lost laptop.

It is well worth the read: Alex Cabal Article.

I intend to follow it.

This is essentially a transcription of his suggested approach, especially the specific instructions which I am applying in my own context.

I duplicate some of his work here for my own use in case Alex may lose or remove his article.
